

Choosing a Caseliner

Protect the spine and support the case with LBS Spine Hollow or Brown Kraft Inlay.

NEW!

LBS Spine Hollow

- Our sturdiest caseliner - manufactured to 15 pt caliper with recycled fibers
- Grey in color with a very smooth surface on one side
- Recommended for automated high-speed casemaking equipment
- Ideal for protecting the spine and supporting the case and book block of heavier volumes
- Great for embossing - will provide a crisp imprint
- Extensively tested and used worldwide

Brown Kraft Inlay

- Made from 100% recycled material
- Brown Kraft paper with textured finish for excellent adhesion to case
- Available in three different calipers for different weight volumes
 - 10 pt
 - 13 pt
 - 17 pt

Tim Baker, Plant Manager, The HF Group - IN

"When our caseliner supply was discontinued, we were so pleased that LBS was able to take care of us. We already count on them to supply us with the best quality cover materials and endsheets. Moving our caseliner business to LBS and ultimately to their Spine Hollow, has simplified our order process and the LBS Spine Hollow runs and cuts well through our equipment. Because the material is sturdier than what we were using, we have even seen some improvements to our finished books."

LBS - quality solutions & great service

Early on we recognized how strongly connected quality materials and excellent service are to a smooth running book line and editions that will last a lifetime. We proudly use this philosophy to serve you and others around the globe with everything needed to make a book.
