EuroWhite™ White One-Side Graphic Board is a low-density board designed with performance in mind. It features a smooth finish with exceptional lay flat properties. EuroWhite White One-side Graphic Board is made from 100% recycled paper. A white kraft sheet is laminated in-line to one surface. This is a cleaner white color than vat lined chipboard, and less expensive than SBS C1S laminated board. Used for publishing or packaging such as rigid boxes or spirits packaging.

Samples available upon request
