

GP5W

NEW FEATURE!

The LBS production team now has the ability to mark the head or foot of your slit capping materials with a line of color. This new feature will reduce orientation issues when feeding book blocks into your casing-in machine and will eliminate the need for you to mark your capping materials with a pen or marker.

Construction 100% cotton

Specifications FSC® certified

Standard Width 42" (106.68 cm) Width;
3" (7.62 cm) ID standard cores

Converting Full-width rolls, slit rolls, and cut-sheets

Adhesive/Glue Acceptable gluing includes: Protein, Polyvinyl Acetate (PVA), Polyurethane (PUR), and Hot Melt

Suggested Uses Yearbooks, Scholarly Editions, Reference Books, Photo Books, Monographs, Coffee Table Books, Art/Architecture Books, On-Demand, Stationery

BOOKBINDING

GP5W combines paper and an open-weave fabric. The fabric reinforces the book block and the paper caps the spine, combining a two-step process into one. Because this material is extremely strong, it is recommended for use on book blocks larger than 1.5" thick. It also reinforces the spine from head to tail and can be applied prior to rounding and backing, creating a very sturdy book block.

PACKAGING & STATIONERY

The unique look of this natural open weave material laminated to a thin paper makes it a great choice for custom projects.

Samples available upon request
