LBS knew Bind-On-Demand and Photo Books need binder's board that is smooth and consistent with warp-resistant qualities. So we worked with WestRock's mill, in Aurora, IL, to develop and launch an exclusive board for the Bind-On-Demand and Photo Book market. We analyzed each step of their operation in order to develop a board that would have the qualities demanded by these markets. The result is our PrimeOne® board. To make PrimeOne consistent, we developed a mixture of waste papers and fiber that would result in a warp-free board that was free of blemishes, smooth, and even in color. We use the cleanest waste paper and fiber available.
