

LSFB

Construction Latex Saturated Fiber Board

Specifications FSC® certified upon request

Origin Manufactured in the USA

Standard Width 53" (134.62 cm) Width; 3" (7.62 cm) ID standard cores

Calipers .015

Converting Full roll, slit roll, cut sheets

Adhesive/ Glue Acceptable gluing includes: Protein, Polyvinyl Acetate (PVA), Polyurethane (PUR), and Hot Melt

Color Black

Suggested Uses Stationery, journals, soft cover books, religious publishing, menus, notebooks

LSFB (Latex Saturated Fiber Board)

is a thin, flexible caselining material designed for applications where a lightweight, pliable board is needed. Its latex-saturated fiber construction provides flexibility and durability for soft-cover books, journals, diaries, and turned-edge binding applications. LSFB is also an excellent choice for religious texts, where it is commonly used as an inner lining beneath PU cover materials for hymnals and soft-cover Bibles. Available in .015 caliper, LSFB provides a slim profile while maintaining the flexibility needed for a clean, finished cover.
