LBS's **Flexira** polyurethane cover material is a soft, flexible, and durable faux leather designed for turned-edge applications including scriptures, menus, books, binders, and luxury packaging. Featuring a supple feel and embossed surface with the rich look and feel of genuine leather, Flexira delivers the elevated aesthetic of eco-leather with lasting performance and visual appeal. Its thermo-sensitive surface allows for unique burnishing effects and decorates beautifully with foil stamping, blind embossing, and screen printing. Available in sophisticated colors, Flexira is an ideal vegan leather solution for projects that demand both softness and durability.
